

JOURNEYMAN LINEMAN

Carroll Electric Cooperative, Inc.

Position Description

Position Title: Journeyman Lineman

Reports to: Line Crew Supervisor / Crew Leaders

Objective:

The Journeyman Lineman is responsible for performing skilled electrical linework associated with the construction, operation, maintenance, and restoration of Carroll Electric Cooperative's electric distribution system.

The position requires a qualified first-class journeyman lineman capable of safely performing overhead and underground linework, working on energized and de-energized facilities, operating line equipment, responding to outages and emergencies, and supporting the development of apprentice linemen.

Responsibilities:

The Journeyman Lineman performs skilled linework associated with the construction, maintenance, repair, operation, and restoration of the Cooperative's electrical distribution system in accordance with Cooperative standards, RUS specifications, the National Electrical Safety Code, and applicable safety requirements.

The position performs work on energized and de-energized facilities and safely operates bucket trucks, digger derricks, line trucks, tools, and other equipment required for electric distribution work.

The Journeyman Lineman is expected to maintain a strong working knowledge of Cooperative construction standards, operating procedures, safety practices, and system requirements while completing assigned work safely and efficiently.

The position provides guidance and instruction to apprentice linemen and assists in their continued development toward journeyman status.

The Journeyman Lineman participates in the Cooperative's on-call rotation and responds to outages, storms, emergency restoration activities, and other operational needs as required.

The employee shall maintain all required licenses, certifications, training, and yearly competencies, including CDL, CPR/First Aid, and applicable OSHA requirements. The Journeyman Lineman may be assigned to perform Crew Leader responsibilities when needed and shall attend training, safety meetings, and other professional development activities as required.

Perform other operational or emergency duties as requested and assigned.

Qualifications:

- Journeyman Lineman certification required.
- Possess a strong commitment to safety and the ability to perform all assigned work in a safe and responsible manner.
- Ability to perform energized and de-energized linework.
- Knowledge of electric distribution construction, operations, maintenance, and restoration.
- Valid Commercial Driver's License meeting Cooperative requirements.
- Ability to safely operate trucks, line equipment, tools, and specialized equipment associated with the position.
- Ability to perform the physical requirements of linework and work outdoors in all weather conditions.
- Ability to participate in on-call duty, outage restoration, storm response, and extended work hours as necessary.
- Strong communication, teamwork, and leadership skills.
- Ability to provide instruction and guidance to apprentice linemen.
- Maintain professionalism and a positive Cooperative image.
- Support Carroll Electric Cooperative's mission of providing Safe, Affordable, and Reliable electric service.
